

**Jürgen Schlösser  
Armaturen**

## **RoHS-Declaration of Conformity**

### **RoHS Directive 2011/65/EU ("RoHS 2")**

The products we deliver do not contain any substances or applications whose placing on the market is prohibited according to the applicable requirements of directive 2011/65/EU ("RoHS 2") .

When implementing the directive into national law, it can be assumed that the minor thresholds for lead and cadmium in the amended annex II of EUR Directive 2000/53/EU on end-of life vehicles dated June 2002 will be adopted.

It defines limit values for lead and cadmium

- Lead max. 0,1 weight percent (1.000 ppm) and
- Cadmium max. 0,01 weight percent (100 ppm)

in homogeneous raw materials. Jürgen Schlösser Armaturen fulfills these requirements with lead-free alloys .

Our lead containing alloys with a content of lead of max. 3.2% comply also with the annex 6 - the exemption for use of lead in copper and brass alloys which allows up to 4% lead by weight according to RoHS directive and requirements of directive 2011/65/EU.

Herewith we confirm the conformity of our alloys concerning raw material with the EU directives 76/769/EWG, 2000/53/EG, 2011/65/EU und 2003/11/EG.
